PROFESSIONAL SUMMARY

Dynamic and motivated IT fresher with a strong foundation in Fullstack web development. Eager to leverage academic training and hands-on experience in developing innovative solutions. A quick learner with a passion for technology and a drive to contribute to high-impact projects in a collaborative team environment.

PROJECTS

• HOSTEL MANAGEMENT SYSTEM

Developed a hostel management system using PHP and MySQL, streamlining student accommodation processes. Implemented features for student management, room allocation, fee tracking, and inventory management. Enhanced user experience and operational efficiency.

• IN DEPTH ANALYSIS OF COMPANY'S REVENUE

Utilized Python for data analytics to analyze [specific type of data, e.g., sales data, customer data]. Implemented data cleaning, exploratory data analysis (EDA), and statistical modeling techniques to derive insights and make data-driven recommendations. Demonstrated proficiency in Python programming and data analysis.

• DISCOVER PERFECT HOMES AND FLATS FOR RENT

Python project for discovering perfect homes and flats for rent involves collecting data from APIs or web scraping real estate websites, and allowing users to search based on criteria like location, price, and amenities. The backend handles filtering and displaying relevant listings, and the interface can be built using frameworks Django.
